

Experiment-6

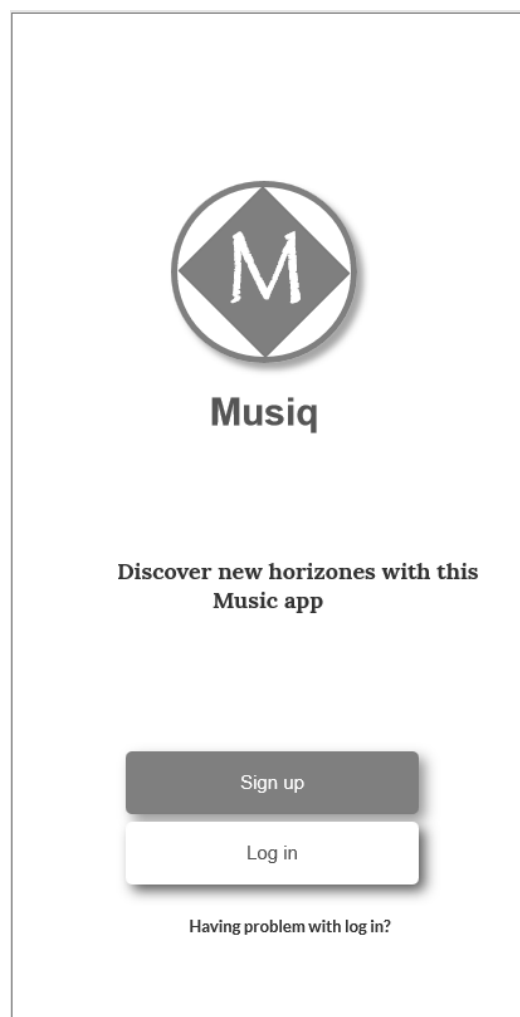

Name:NITHISH RAJ L

Rollno:240701366

**Simulate the lifecycle stages for UI design using the RAD model
and develop a small interactive interface using Axure RP**

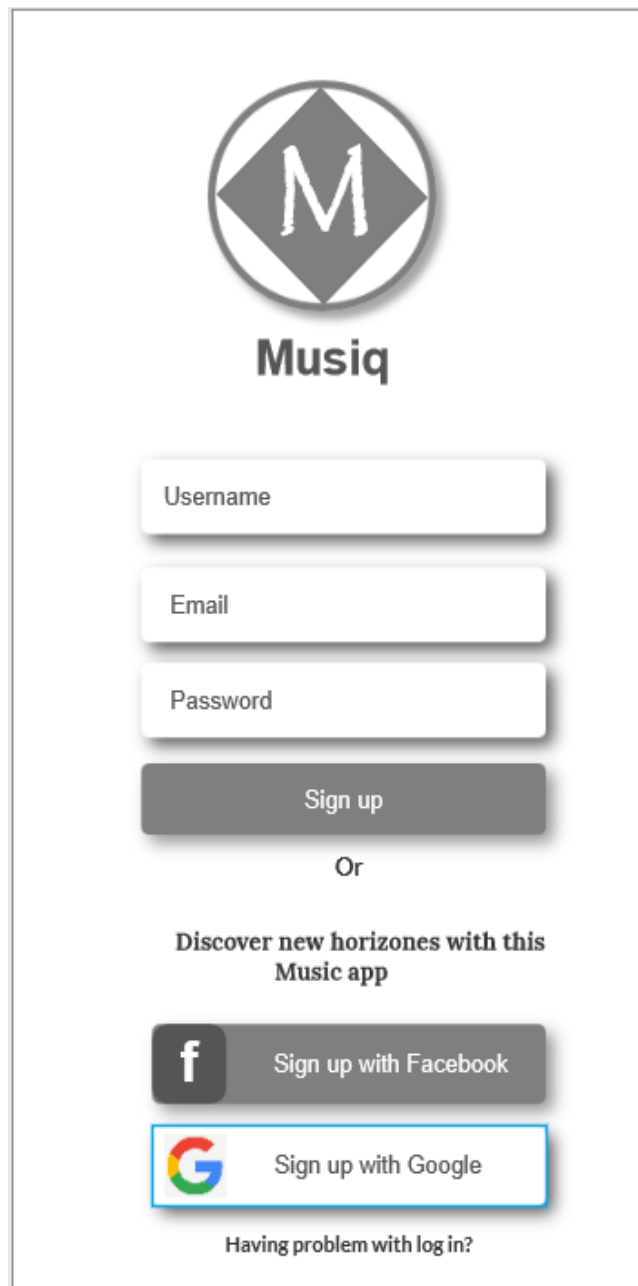

1. Welcome Screen

- This is the initial screen of the application
- It provides options like Sign up and Log in
- These buttons are used for navigation in the prototype
- The design is simple and visually clean
- It gives users a basic idea of how the app starts

2. Sign Up Screen

- This screen is designed to show how user registration will look
- It contains input fields like username, email, and password
- Social sign-up options are included for design purpose
- No real data is stored, it is only for UI demonstration using Axure RP
- It helps visualize the registration process

The image shows a mobile app sign-up screen for 'Musiq'. At the top is a logo consisting of a white 'M' inside a dark diamond, which is inside a white circle. Below the logo is the word 'Musiq' in a bold, sans-serif font. The form contains three input fields: 'Username', 'Email', and 'Password', each with a light gray border and a subtle shadow. Below these is a dark gray 'Sign up' button with white text. Under the button is the word 'Or' in a small, gray font. Below 'Or' is the text 'Discover new horizons with this Music app' in a bold, gray font. There are two social sign-up buttons: one with a white 'f' on a dark gray background labeled 'Sign up with Facebook', and another with the Google 'G' logo on a white background with a blue border labeled 'Sign up with Google'. At the bottom is a link that says 'Having problem with log in?' in a small, gray font.

Musiq

Username

Email

Password

Sign up

Or

Discover new horizons with this
Music app

f Sign up with Facebook

G Sign up with Google

Having problem with log in?

3. Music Player Screen

- This screen represents the music player interface design
- It displays song details like title and artist
- Includes controls such as play, pause, next, and previous
- Buttons are used to simulate interaction in the prototype
- It gives an idea of how the final music app will function
