

Experiment-7

NAME: NITHISH RAJ L

ROLLNO:240701366

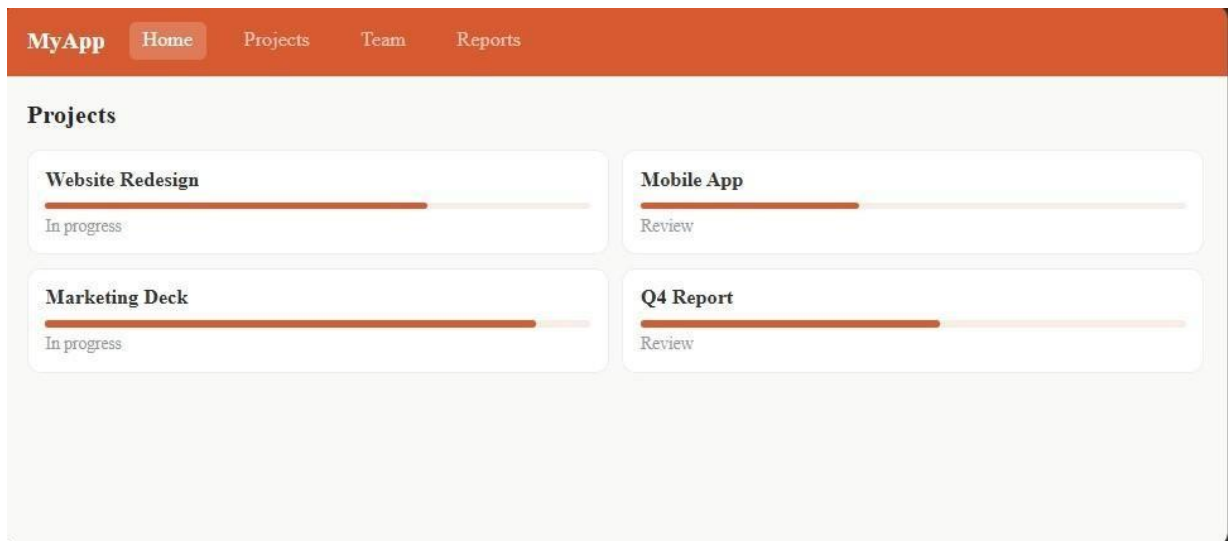

Experiment with different design structures and color palettes for the application and Gather user feedback.

WireFrame Designs with difference color palettes:

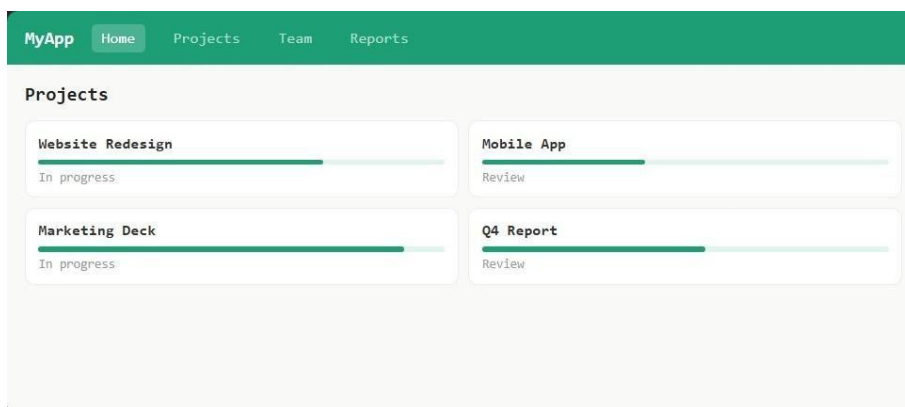

Inter font With lagoon theme ^{£^3}:

Inter is a modern sans-serif typeface designed for digital interfaces, known for its clarity and readability on screens. It is widely used in mobile apps and web applications because of its clean and minimal design. The Lagoon theme uses calming colors such as blue, teal, and turquoise inspired by lagoon waters. Combining Inter font with a Lagoon color palette creates a visually appealing, modern, and user-friendly interface suitable for applications like waste management systems.

Playfair Display with Kesariya theme £³

Playfair Display is a stylish serif typeface often used for headings and titles because of its elegant and classic appearance. It gives designs a sophisticated and professional look. The Kesariya theme uses warm colors such as saffron, orange, and golden shades inspired by traditional Indian aesthetics. Combining Playfair Display with the Kesariya color theme creates a bold, elegant, and culturally rich interface suitable for creative and informative applications.

SPACE MONO FONT WITH GREEN THEME£³

Space Mono is a monospaced typeface designed for digital and technical interfaces. It provides a clean and structured appearance, making it suitable for coding environments and modern UI designs. The green theme uses shades of green that symbolize nature, growth, and sustainability. Combining Space Mono with a green color palette creates a simple, fresh, and eco-friendly interface ideal for applications related to technology or environmental management.
